

The problems numerical relativists  
solve are esoteric

Few need relativistic physics, fewer  
need Einstein's gravity

$$G_{\mu\nu} = 8\pi T_{\mu\nu}$$

The problems numerical relativists  
solve are esoteric

Few need relativistic physics, fewer  
need Einstein's gravity

Most numerical relativity codes are  
of no use to the world at large

$$G_{\mu\nu} = 8\pi T_{\mu\nu}$$
